Work History

June 2019 - Current

Senior Consultant

Deloitte US India, Hyderabad

- Client is a niche market insurer and is one of the largest church insurers licensed in all 50 states of the United States. (GuideOne Insurance, West Des Moines, Iowa, US).

My Responsibilities:

- Worked on Policy Center Configuration, Forms, Integration for commercial lines of business – CA, BOP, CPP, UMB and WC.
- Worked on writing REST API, collaborated with developers and performance engineers to enhance supportability and identify performance bottlenecks.
- Build, test and deploy scalable, highly available and modular software products.
- Led the team of 12 members and collaborated with multiple teams for sprint deliveries. Own grooming, estimations and task allocations to team members.
- Worked as a Technical Lead and SME for Guidewire Policy Center.
- Worked on small fixes and enhancements for Guidewire Digital 9 and integrations.
- Working on the sprint from the planning phase to production deployments.
- I hold 10+ environments taking care of deployments and build failures.
- Run effective daily scrum meetings and escalation meetings. Providing resolution to risks raised by cross teams.
- Understand the client requirements, provide design and approach for critical story

cards.

Jan 2018 –
June 2019

Consultant

Deloitte US India, Hyderabad

- Client is a niche market insurer and is one of the largest church insurers licensed in all 50 states of the United States. (GuideOne Insurance, West Des Moines, Iowa, US)

My Responsibilities:

- Worked on Policy Center Configuration, Forms, Integration for commercial lines of business – CA, BOP, CPP, UMB and WC.
- Worked on Policy Center Configuration for Commercial lines of Business and handled large enhancements and state rollouts. Worked on UW Issues and Activities, Policy Holds, Coverages, Payload Creation.
- Worked on Guidewire Digital 9 (Edge Back End Only), on user stories related to Location/Buildings for both retrieve/save. Worked on Setting up Guidewire BOP Portal for Edge Services which included Handlers, Plugins and DTOs configuration.
- Worked on systematic declinations in guidewire digital by utilizing PC Validation framework. Worked on Underwriting issue plugins and exception handling.
- Participated in scrum meetings under the agile methodology.

Mar 2015 –
Jan 2018

Associate Technical Lead

EY (Ernst & Young)

- Client is a provincial Crown corporation established in 1973 to provide universal auto insurance to B.C. motorists. They are also responsible for driver licensing, and vehicle licensing and registration. (ICBC- Insurance Corporation of British Columbia)

My responsibilities:

- Involved in requirements gathering and analysis for large user stories such as Garage, and package policies architecture.
- Involved in working for renewal workflows and new wizards for different auto products.
- Involved in writing the design documents and use case documents.
- Involved in coding for requirements.
- Involved in Unit testing, SIT & Regression testing.
- Involved in defect triage and distribution of defects among team.
- Involved in project management activities like Capacity preparation, DSR, WSR reports.

Feb 2014 -
Mar 2015

Senior Software Developer

Syntel Pvt Ltd, Chennai, Tamil Nadu

- Client provides Banking/Financial/Credit-Card services to customers across the globe. This project is to securely exchange file between American Express and its partners. This File-Services (SFT) project is an enterprise level utility which involves the transfer of files within Client (Intranet transfers) and external to Client (Internet transfers).
- To migrate the existing application from vendor ST to SEEBURGER. In existing system SFT is communicating to ST vendor to replicate the users into ST database via MQ.

Going forward we are going to replicate the profiles created in TP to directly SEE BURGER via web services.

My responsibilities:

- Worked as a Technical Lead Developer for REST web service integration and backend layer.
- Created and implemented development strategies to complete the assigned module without any defects.

July 2013 -
Jan 2014

Senior Software Developer

Syntel Pvt Ltd, Chennai, Tamil Nadu

- Client provides Banking/Financial/Credit-Card services to customers across the globe. This project is to securely exchange file between American Express and its partners. This File-Services (SFT) project is an enterprise level utility which involves the transfer of files within Client (Intranet transfers) and external to Client (Internet transfers).
- To migrate the existing application running on WAS 6.1 to WAS 7.0. Various components like Jconfig Manager, Sevice Locator, JLog, log4j, Juice, and quartz scheduler were migrated to either a higher version or to support spring 3.1.

My responsibilities:

- Understand the client requirement to kick off the project from scratch.
- Define the high-level workflows of system to be implemented.
- Define Logging and Exception Handling Framework.
- Involved in deep dive research for understanding the WAS architecture and created design documents.

Jan 2013 -
June 2013

Software Developer

Syntel Pvt Ltd, Chennai, Tamil Nadu

- Client provides Banking/Financial/Credit-Card services to customers across the globe. This project is to securely exchange file between American Express and its partners. This File-Services (SFT) project is an enterprise level utility which involves the transfer of files within Client (Intranet transfers) and external to Client (Internet transfers).
- Client needed enhancement in application for Front End side and Password security for users on different encryption algorithm and SMTP requirements for auto triggered email when users are deleted or modified.
